PROFESSIONAL SUMMARY

Frontend Developer with 2.2 years of experience specializing in building responsive, user-centric web applications using React.js, HTML, CSS, and JavaScript. Proficient in Redux for state management and Jest for testing, with a strong focus on collaboration, problem-solving, and delivering high-quality digital experiences. Skilled at working in fast-paced, agile environments, and dedicated to continuously improving and adapting to new technologies. Seeking to leverage my expertise and contribute to a dynamic development team.

WORK EXPERIENCE

Cognizant Technology Solutions • Pune • Full Time • 08/2022 – 10/2024

➤ Programmer Analyst (MARS)

- Developed and maintained functional and UI aspects of 3+ enterprise level web apps using core fundamentals of **React.js** i.e. **hooks**, **components** (functional & class based), **React Redux**, Context API, lifecycle methods, fundamentals of **Typescript & JavaScript (ES6)**.
- Implemented techniques like **lazy loading**, **code splitting** and **memorization** which improved the efficiency of the application, reduced the loading time of the web pages by **18%** and improved search engine optimization leading to lower bounce rates.
- Integrated **RESTful APIs** web services for **GET**, **POST**, **PUT** and **DELETE** methods to display & update data on UI using the **Fetch API**.
- Collaborated with backend developers and designers to implement UI designs to ensure seamless integration with backend systems. Optimized components, debugged application code for maximum performance across a vast array of web-capable devices and browsers.
- Actively aided the team in different phases of project enhancement including resolving user stories, analyzing requirements for technical feasibility, designing the solution & following **Agile methodology**.
- Performed Unit Testing through **Jest** to ensure bug free applications leading to a **30%** improvement in bug detection efficiency.

➤ Programmer Analyst (Spark Clothing)

- Developed a responsive e-commerce web application, replicating the core functionalities of e-commerce using **React.js**, **HTML**, **Bootstrap CSS** and **JavaScript**.
- Implemented dynamic **routing** using **React Router** to create seamless navigation across various product categories, filters, and search features.
- Integrated **RESTful APIs** with **Axios** to manage data display and updates on the UI through efficient GET, POST, PUT, and DELETE requests, ensuring seamless communication between the frontend and backend systems.
- Designed reusable components to ensure efficient development and consistency across the platform, including product cards, carousels, and navigation menus.
- Integrated state management using **Context API** for handling shopping cart functionality, user authentication, and product filtering.
- Ensured high-quality code with unit testing using **Jest**, focusing on component behavior and interaction.

SKILLS

- Languages:** JavaScript, TypeScript, HTML5, CSS, SASS /SCSS, jQuery
- Frameworks & Libraries:** React.js, React Redux, Jest, React Router, Bootstrap, Tailwind CSS, Axios, Fetch API
- Tools & Databases:** Git, GitHub, Jira, Visual Studio Code, MS Office, MySQL

CERTIFICATION

- AWS Cloud Practitioner, GitHub Copilot Developer

EDUCATION

- B.E in Electronics & Communication Engineering | RCOEM CGPA: 9.36 | (2018 - 2022)
- XII (State Board) 80.77 % | 2018
- X (State Board) 94.40 % | 2016
